

## FIRE PROTECTION PRODUCTS

The Mueller<sup>®</sup> UL listed and FM approved Check Valves are of the gravity operated, swing check design. These Check Valves are rugged in construction and simple in design.

Mueller Check Valves are designed to permit the removal of all parts through the top of the valve for inspection or replacement without removing the valve from the line.

Mueller Check Valves are bossed on both sides of the body for connecting by-passes and have a drain plug at the bottom under the inlet end for attaching a drain valve. These Check Valves are available with rubber disc facings.

- Cover Bolts and Nuts are electrogalvanized steel to resist corrosion.
- All internal parts can be removed for inspection or repair without removing valve from line.
- Ductile Iron Body is accurately cast and machined to provide long and trouble free service.
- Ductile Iron Cover has a lifting lug.
- Mueller Co. also offers a full line of AWWA Type Check Valves. See Mueller Water Works Catalog for further information.
- Operating parts made of bronze and stainless steel to reduce corrosion.
- Accurately machined Bronze Seat Ring.
- 2" - 12" 350 PSI C.W.P.
- 14" & 16" - 250 PSI C.W.P.
